we don't intend--at least con-  
sciously.

pens when a physiologist learns  
to power a model train with her  
brain waves.

reflect moods and expose secret  
personality.

TO WORK FOR THE MIND--Muscle  
control through biofeedback  
can lead to startling changes  
in consciousness and awareness,  
and reveal human will in the  
control of a single nerve cell.  
SECTION IV--HEARTBEAT AND BLOOD  
PRESSURE: ACTS OF WILL--The  
mind can relieve illnesses as  
well as create them; new tech-  
niques offer hope for hyper-  
tensive patients.  
SECTION V--THE CONSTANT, CRYPTIC  
WAVES FROM THE BRAIN--Alpha  
waves can be an aid to medita-  
tion or treatment for neurosis;  
besides, they feel good.  
SECTION VI--THE NEAR FUTURE:  
SEEDS OF CONJECTURE--Practical  
applications of biofeedback to  
education, medicine and therapy  
are closer than you think.  
Brown also speculates about  
possible uses of the tech-  
niques in space flight and  
parapsychology.

BUSINESS, Vol. 8, No. 8, Jan.

ties, and view all results as  
inevitable. This habit dis-

tracked the changes in the  
brain that go along with learn-

research asks why male dogs  
lift their legs, why bitches  
reject some males, whether  
impotence follows castration,  
and why an excess of male hor-  
mones makes rats effeminate.  
The answers have human implica-
